

A large circular collage of kiteboarding photos surrounds a central logo. The photos show various kiteboarders in action: performing tricks, riding waves, and flying over water. The central logo is for 'PIKS DISTRIBUTION' with the tagline 'EVERYTHING KITEBOARDING' on a blue banner.

# PIKS

DISTRIBUTION

EVERYTHING KITEBOARDING

**Here at PKS Distribution, we are dedicated to the enjoyment of kitesurfing at every level.**

**Our location in Portland Texas, right on Corpus Christi Bay, the most consistently windy place on average in the US affords us the ability to ride nearly every day of the year. We are rider-owned and operated and dedicated to the development of the sport, working closely with many manufacturers of kite equipment and accessories to develop our sport in a safe and performance-oriented manner. Born out of a small kite production operation started by Jeff Howard, PKS Distribution has progressed into a distributor and design team for high end kiteboarding products.**

## **THE PKS PROMISE**

**Stock it, Sell it, or we'll buy it back\***

No other distributor has your back like we do

\*Must hold stock at least 5 months before rotating.

\*Closeouts and Custom-items not applicable.

# Pigtails & Pullies

[Click here to Shop This Category at  
www.pkdistribution.com](http://www.pkdistribution.com)

# Universal Pigtails

PKS Universal Pigtails V3 - Universal pigtails are uniquely designed to allow for either a loop to loop or loop to knot configuration with a single pigtail. Simply larks head the loop end of the pigtail onto the end of your fly lines or directly to the bridles on the kite and you're all set to connect to the loop or knot on the other side, making a nearly kook-proof connection point.

## Features:

- 6 Inches Loop-Loop Length
- Integrated Double Overhand Knot
- Full Length splice secured with precision micro -stitching
- 100% High Strength Low Wear Spectra Line

[Back to Index/Shortcuts](#)

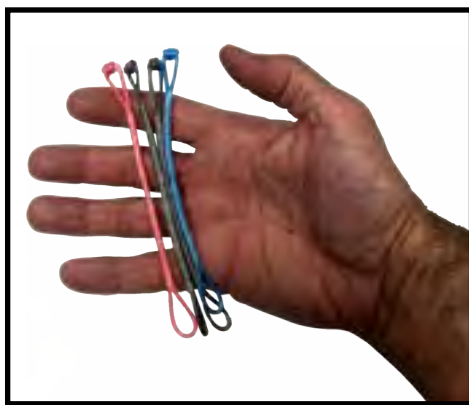

# PKS Universal Race Pigtail Set

The new PKS Universal Race Pigtail is the newest pigtail from PKS Distribution for the lightest weight and lowest parasitic drag universal connection between kite and bar. Universal race pigtails are uniquely designed to allow for either a loop to loop or loop to knot configuration with a single pigtail. Simply larks head the loop end of the pigtail onto the end of your fly lines and you will have both a loop and knot on all 4 lines allowing you to connect to any kite.

## Features:

- Double Overhand Knot
- Smallest profile pigtail available
- Full length splice
- 100% Made In USA
- 1124lb Elite 99 Line

# PKS Stainless Steel Ring Ultralight / Race Pigtail Set

PKS Stainless Steel Ring Ultralight / Race Pigtail Set  
The new PKS Stainless Steel Ring Ultralight / Race Pigtail is the newest pigtail from PKS Distribution for the lightest weight and lowest parasitic drag universal connection between kite and bar. Stainless Steel Ring race pigtails are uniquely designed to allow for very secure connection using Fly Line only connections. Simply larks head the loop end of the Kite pigtail onto the stainless steel ring for a secure connection.

## Features:

- Micro Stainless Steel Ring
- Smallest profile pigtail available
- Full length splice
- 100% Made In USA
- 1124lb Elite 99 Line

# PKS Loop - Loop Pigtail Set

New From PKS - Standard Loop-Loop Pigtail Set

Clean, Easy, Versatile

Made In USA

Features:

- 6 Inches Loop-Stopper Ball Length
- 1" Loops
- Full Length splice secured with precision micro stitching
- 100% High Strength Low Wear Spectra Line

[Back To Index / Shortcuts](#)

# PKS Quick Connect Pigtail With Stopper Ball

New From PKS - Quick Connect Pigtail Set w/Stopper  
**\*Sold Individually**

Designed to be used with Wing leashes for a quick connect and removal from one wing to another. No need to have a leash for every wing, just easily move your leash from wing to wing using the Quick Connect pigtail with stopper ball.

## Features:

- 4 Inches Loop-Stopper Ball Length
- 16mm Ronstan Stopper Ball
- Full Length splice secured with precision micro stitching
- 100% High Strength Low Wear Spectra Line
- Sold Individually

[Back To Index / Shortcuts](#)

# Kook Proof

PKS Kook Proof Pigtail set is the perfect way to replace worn pigtails or to adapt almost any bar to a kite. They are made of spectra leader line and designed for quick and simple installation saving you money and time off the water.

## Features:

Preset knots for multiple line length adjustments

- Pull-tabs for ease of use
  - Color coded inside and outside lines
- lines
- Includes 8 individual pigtails

[Back to Index/Shortcuts](#)

# Universal Adjustable

The new PKS Adjustable Universal Pigtail is the latest and greatest pigtail for a universal connection between kite and bar. These pigtails are similar to our classic universal pigtail, but are made extra-long and feature a moveable figure-8 knot to allow for adjusting the pigtail length. This is great if your lines settle to different lengths and you need to tune them to get them to be all the same length.

## Features:

- Adjustable from 6-9 Inches
- 100% Spectra Line
- Available as a Set of 4 or a set of 2

# XL Universal Adjustable

The new XL PKS Adjustable Universal Pigtail is the latest and greatest pigtail for a universal connection between kite and bar. These pigtails are similar to our classic universal pigtail, but are made extra-long and feature a moveable figure-8 knot to allow for adjusting the pigtail length. This is great if your lines settle to different lengths and you need to tune them to get them to be all the same length.

## Features:

- Adjustable from 9-12 Inches
- 100% Spectra Line
- Available as a Set of 4 or a set of 2

# Ozone OEM Pigtails

Ozone replacement pigtails for a 4-line kite. These pigtails connect to the bridle lines coming off the kite and allow you to hook up your flying lines. These work with all Ozone 4-line kites.

Set includes 4 pieces with:

Pull-tabs for ease of use

Color coded and numbered inside and outside lines

- 1 blue loop-loop pigtail
- 1 red loop-loop pigtail
- 2 grey loop-knot pigtails

# Ozone OEM Race Pigtails

## Standard Race Pigtail Set

Ozone replacement race pigtails. These pigtails connect to the end of the race flying lines and allow you to hook up your flying lines to the pigtails on the kite.

Pigtails are made of Fly Line to minimize parasitic drag.

### Includes:

- 2 - Loop-Loop Pigtails
- 2 - Loop-Knot Pigtails

# Ozone OEM Pro (3 Knot) Race Pigtails

## Pro Race Pigtail Set

Ozone Pro Race 3 Knot race pigtails. These pigtails connect to the end of the race flying lines and allow you to hook up your flying lines to the pigtails on the kite. These have 3 different knots for easy tuning of your kite.

Pigtails are made of Fly Line to minimize parasitic drag.

### Includes:

- 2 - Loop-Loop Pigtails
- 2 - Loop- 3 Knot Pigtails

# Custom or Brand Specific Pigtails

We can make many different types or styles of Pigtails from Sheathed Dyneema pigtails for Airush and Duotone, to short Spectra Pigtails with pull tabs for Slingshot.

We can also make just about anything for your specific application that you might need. If you can draw it for us, we can make it for you.

For custom requests, Call Joey @ 361-977-2041 or E-Mail [joey@pksdistribution.com](mailto:joey@pksdistribution.com)

Duotone Pigtail Set

Airush Outside Line Pigtails

[Back to Index/Shortcuts](#)

# PKS -North Kites Pigtail Set

## PKS - North Kites Pigtail Set

PKS Replacement North pigtail Set. These pigtails connect to the bridle lines coming off the kite and allow you to hook up your flying lines. Always check kite pigtails for wear and tear. Made from 7/64" 100% Dyneema line

### Features:

- Pull Tab on Outside Lines
- Full Length splice secured with precision micro stitching
- 100% High Strength Low Wear Dyneema Line
- Set of 4

# Ronstan Orbit Block

The Ronstan Orbit Block kite pulley is perfect for anyone tired of going through pulleys or the danger of failing pulleys. Though very similar in size to standard pulleys, the Orbit Block is way stronger with a 1200 pound rating. The Orbit Block is a ball bearing pulley, which will keep it freely spinning much longer than standard plastic wheel and axle pulleys that jam up easily, causing wear on your bridle lines. These pulleys come standard with our custom-stitched line going through the pulley. The loop is dual purpose providing a connection to a kite line and if there is a failure you can still maintain control of the kite and there will be no wear on your bridle!

## **Pigtail Options:**

- Standard Loop
- Cabrinha Pigtail Loop
- Naish Pigtail
- Wainman
- Custom (to your specs)

Shown with Standard Loop

# Ronstan Shock Block Sheaveless Pulley

The Ronstan Shock Block Sheaveless Pulley is only 7/8" long, yet it is very strong, super lightweight, and designed for performance.

## Specifications:

Weight: 2.50 g (.01 oz)

Maximum working load: 175 kg (385 lb)

Breaking load: 350 kg (770 lb)

Length: 22.9 mm (7/8")

Width: 14.9 mm (9/16")

Depth: 8.5 mm (5/16")

Line capacity: 1.4-5.0 mm (1/16"-3/16")

Optimum line capacity: 1.4-3.0 mm (1/16"-1/8")

## Pigtail Options:

No Pigtail

Standard Loop

Cabrinha Pigtail Loop

Naish Pigtail

# Leashes

[Click here to Shop This Category at  
www.pkdistribution.com](http://www.pkdistribution.com)

# PKS MINI Slider Leash:

The MINI Slider Leashes are push-away leashes that are fully releasable under load by pushing the soft foam handle. The high-strength webbing eliminates material breakdown found in Neoprene leashes, and the internal bungee helps to absorb the shock of full flag-out when you release your chickenloop. Simple pin system is easy to reload that leash. These also have removable carabiner clips on each end so it's very easy to replace them if they ever have problems.

# Slider Handle-Pass Leash

**PKS Slider Handle-Pass Leashes are push-away leashes that are fully releasable under load by pushing the soft foam handle. The high-strength webbing eliminates material breakdown found in Neoprene leashes, and the internal bungee helps to absorb the shock of full flag-out when you release your chickenloop. Simple pin system is easy to reload that leash. These also have removable carabiner clips on each end so it's very easy to replace them if they ever have problems.**

# Micro Leash

**There's a new quick release system on the market aimed at keeping it as simple as possible: the PKS KISS Loop. Weighing in at 0.8 ounces, it's one of the lightest kite leashes on the market. Jeff Howard is always working on new things and his most recent project is designing the most simple quick release the kite industry has seen. It's recommended for experienced kites who want to build the most minimal and easy to use bar setup for foiling and light wind use.**

# Dakine Shorty Leash

**Dakine releases the new Kite Leash Shorty!**

- **Stainless steel trigger snap with padded cover**
- **1/4" (6.5MM) highest quality urethane Dura-Cord for maximum strength**
- **Molded Opti-Flex Leash ends for maximum durability**
- **Push away disconnect attachment 25"(64cm) Length**

# Ozone Leashes

## Short Leash V2

## Handlepass Leash v2

**Stainless Steel clip, Push-Away release, Simple re-load, Neoprene clip cover**

# Control Bars

[Click here to Shop This Category at  
www.pksgiving.com](http://www.pksgiving.com)

# PKS Standard Control Bar

## PKS Kite Control Bar

Eva covered control bar with a polished center hole for smooth movement on chicken loop lines.

Bar can be ordered with or without leader lines. We can also make the leader lines to your specification.

Compatible with KISS system.

### Sizes:

Small (43cm)

Standard (50cm)

[Back to Index/Shortcuts](#)

# Ozone Contact Water Freeride Control Bar V5

The design of our innovative quick release system, the Click-In Loop, was inspired by the same principle. In the same way fastening your seatbelt has become a natural action when getting into a car, riders should activate and reload their release systems before and after every use. Although this important safety check is often overlooked, checking your release before each session will ensure it is functioning properly.

## What's New:

**NEW ERGONOMIC EVA GRIP** - 3D pressed EVA with ergonomic shaping and a lightly sanded finish provide the ultimate bar grip. It is colour coded with the leader lines and flying lines for an added visual safety feature.

**UPDATED SOFT BAR ENDS WITH LEADER LINE ADJUSTMENT** - An updated design with reduced bulk and reduced stainless steel leader line pin height improves bar feeling. The leader lines are adjustable via knots inside the float, simply pull out from the opening to access and adjust to your preference.

**NEW CLEAT BASE** - All V5 control systems feature our new custom designed cleat base for extra strength, fitted with an anodized low abrasion Clamcleat.

**NEW BIO-BASED DYNEEMA MODULAR FLYING LINES** - Colour coded lines are precision cut, pre-stretched, spliced and sewn in our own production facility to guarantee accuracy. We use the highest quality Bio-based Dyneema - this material has the same performance as conventional Dyneema® with a carbon footprint that is 90% lower than generic HMPE fiber.

**New Pigtails / Line Connectors** - Our modular design makes adding or removing extensions quick and easy via removable pigtail end line connectors.

# Ozone Contact Water Bar V4

A push-away quick release with an innovative one-step Click-In reload function that is incredibly intuitive. The release handle fits comfortably in the hand, it is quick and easy to activate the release by pushing the handle away. A self-positioning release mechanism locates automatically, ready to be re-loaded by simply 'clicking' in the loop. The Click-In Loop is AFNOR NF S52-503 certified.

## Features:

- Innovative Click-In Loop
- Two Release Modes
- Three Loop Size Options
- Spinning Head with Anti-twist Flag Out Line
- Soft Bar Ends with Leader Line Adjustment
- Stainless Steel Leader Line Pin
- Light Weight Aluminium Centre Piece
- Ergonomic EVA Grip
- PU Covered De-power Line
- Stainless Steel Trimmer Bracket
- Clamcleat Trimmer
- Re-launch Balls

## Sizes:

38cm / 45cm / 50cm / 55cm / 62cm

[Back to Index/Shortcuts](#)

# Ozone Contact Foil Bar V4

A push-away quick release with an innovative one-step Click-In reload function that is incredibly intuitive. The release handle fits comfortably in the hand, it is quick and easy to activate the release by pushing the handle away. A self-positioning release mechanism locates automatically, ready to be re-loaded by simply 'clicking' in the loop. The Click-In Loop is AFNOR NF S52-503 certified.

## Foil Brake Handle:

This easy to grab handle makes inflation, self-landing and reverse launch easier. Always use the Brake Handle when flying a foil kite. The Brake Handle is removable to use the control system with an inflatable kite.

## Features:

- Innovative Click-In Loop
- Two Release Modes
- Three Loop Size Options
- Spinning Head with Anti-twist Flag Out Line
- Soft Bar Ends with Leader Line Adjustment
- Stainless Steel Leader Line Pin
- Light Weight Aluminium Centre Piece
- Ergonomic EVA Grip
- PU Covered De-power Line
- Stainless Steel Trimmer Bracket
- Clamcleat Trimmer
- Re-launch Balls

## Sizes:

# Flysurfer Infinity XX Control bar

The classic FLYSURFER Control Bar System with automatic untwisting function has proven its ground for many years. The slim INFINITY XX transmits your movements with high precision! It immediately reacts to your steering impulse and gives you a strikingly sporty feeling. The slick Control Bar is especially for riders who want to get even more response from their kite.

A slim and solid bar stick with compact winders gives you excellent feedback. The INFINITY bar slides along a 52cm long PU-covered depower throw and activates the automatic swivel function when powering up with minimal force. Trim options are provided by the Clam Cleat adjuster and the knot positions located under the EVA floaters to adjust the 17 + 3m long lines.

## Features:

- Quick Release 4.0
- Infinity Bar stick
- Infinity System
- Infinity Adjuster
- Single Front Line Safety
- Double V-Shape Eyelet

## Sizes:

- M - 43-50cm / 17+3m Lines
- L - 53-60cm / 17+3m Lines

# PKS K.I.S.S. Control System

What is KISS? It is an engineering concept that simply means; Do not over complicate things, **Keep It Simple Stupid**

# PKS Full Carbon KISS Hydrofoil Bar v2

Full Carbon KISS Kite bar. 100% hand made in the USA. Available in standard sizes of 45cm, 50cm, and 55cm with custom sizes available upon request. Colored end connection loops are standard for outside line leader connections.

Designed in house by Jeff Howard, the Carbon KISS bar was designed with light weight foiling and racing in mind. The bar weigh in as low as 4 ounces. depending on length, and is the ultimate in simplicity and minimalism.

The Bar comes with replaceable, Red and Blue mini Leader lines with loops to attach whatever leaders suit your riding style

## Ready 2 Ride Features:

- KISS Loop
- Custom Line Length 20-25m
- Mini Racerback Clam Cleat
- Adjustable Leader Lines
- Weighs under 1 pound

## Bar Sizes / Weights:

- 45cm - 4 Ounces
- 50cm - 4.2 Ounces
- 55cm - 4.8 ounces

# Fly Lines and Extensions

[Click here to Shop This Category at  
www.pksdistribution.com](http://www.pksdistribution.com)

# Elite 99

Developed in conjunction with Robline, a worldwide leader in technological watersports line manufacturing, and manufactured from Dyneema SK 99 fiber, comes the new PKS Elite 99 Lines. The PKS Elite 99 lines are a high strength, low stretch kite line. The Line sets are manufactured with spliced and sewn loops.

Lines are Pre-Loaded for a more consistent and responsive feel from kite to bar. This lets you have a greater sense of where the kite is and what it is doing even on a kite with lighter bar pressure.

Utilizing an enhanced impregnation and coating process and using a stabilized UV and abrasion resistant protective coating, the lines maintain their consistent and responsive feel for many years of use throughout their life.

Available in any Custom Length Line Set, Extension set, or as Bulk Line on a Spool. Elite 99 will meet and exceed your fly line and extension needs.

In Standard configuration there is a combination of heavy duty lines for the center and lighter lines for the outside steering lines giving you the best configuration for optimal performance.

A 12-braid technology line with high breaking load and low elongation due to the Dyneema SK99 fiber.

Spliced and sewn line ends for the strongest connection.

Precision high strength micro stitching with high strength UV treated thread.

# Elite 99 Standard Fly Line Sets

Elite 99 Standard fly Line Sets use a combination of 1124lb Line for the center lines and 850lb line for the outside lines. This configuration offers the best of both worlds for a standard line set.

Standard Colors are Red, Grey, Grey, Blue but we can make line sets in any color combination you want.

## Specifications:

Center / Front Lines  
Diameter [mm] - 1.7mm  
Rated - 1124 Pounds

Outside / Steering Lines:  
Diameter [mm] - 1.3mm  
Rated - 850 Pounds

Available in any Length you need!

# Elite 99 Race/Hydrofoil Fly Line Sets

Elite 99 Race/Hydrofoil fly Line Sets use only the smaller 850lb line for all lines. This configuration offers the highest performance in light wind or race conditions with the lowest parasitic drag.

Standard Colors are Red, Grey, Grey, Blue but we can make line sets in any color combination you want.

## Specifications:

All Lines:

Diameter [mm] - 1.3mm

Rated - 850 Pounds

Available in any Length you need!

[Back To Index/Shortcuts](#)

# Elite 99 Heavy Duty Fly Line Sets

Elite 99 Heavy Duty fly Line Sets use a combination the 1124lb Line for all lines. This configuration offers the highest strength line set for Heavier riders or higher wind applications.

Standard Colors for the Heavy Duty set are all Grey, but we can make line sets in any color combination you want.

## Specifications:

All Lines

Diameter [mm] - 1.7mm

Rated - 1124 Pounds

Available in any Length you need!

# Q-Power Pro Line

PKS Distribution is the Exclusive Distributor of Q-Power Line.

Q-PowerLine Pro was developed and engineered for kiteboarding and power kite applications. The unique construction utilizes continuous linear strands of very high tenacity Spectra 2000 fiber encased in an extremely tight braided Spectra 2000 sheath. The resulting line exhibits the ideal characteristics for kiting: almost zero stretch means minimal length adjustments and incredible kite "feel" when flying, no sleeving required makes it easy to produce custom sets, self-lubrication ensures minimal friction during line wraps, a round cross-section minimizes parasitic wind-drag increasing both the kites forward speed and response to pilot input, a tight external braid reduces dirt abrasion, and a higher modulus (stiffness) than traditional lines almost totally eliminates line tendency to tangle.

**Available in any Custom Length Line Set, Extension set, or as Bulk Line on a Spool. Q-Power Pro will improve how your kite feels in the air.**

# Ozone Standard Fly Line Sets

Ozone Standard Fly lines are 500kg/300kg kitesurf lines made from SK99 Dyneema fiber. This new fiber is stronger and less sensitive to shrinkage and stretch. Combined with new industry-leading braiding technology this will not only keep your lines at factory length for a longer time but also provides a more direct feeling and connection to your kite - especially steering inputs are more immediate with less delay giving you a faster, more reactive kite.

## **Standard Lengths:**

27m, 25m, 23m, 21m, 20m, 15m, 13m, 10m

**Custom Lengths Available**

[Back To Index/Shortcuts](#)

# Ozone Race Fly Line Sets

Turbo charge your kite racing or light wind setup with high performance Ozone Pro Race lines. These lines have been developed to work in unison with the Contact Race and Contact Foil Race Control System. Race Lines can also be fitted to the standard Contact Water and Contact Foil Control Systems.

The race lines are thinner in diameter than standard lines, offering reduced parasitic drag for faster speeds on the course and better performance in light winds. Using the race lines you will notice a gain in performance upwind and downwind.

All Ozone lines are made from the highest quality pre-stretched Dyneema available.

High performance, low drag  
300kg front lines, 200kg back lines

## **Standard Lengths:**

25m, 23m, 21m, 20m, 15m

**Custom Lengths Available up to 50m**

[Back To Index/Shortcuts](#)

# PKS Trainer Line Set

PKS Trainer Kite Lines fly above the rest. PKS trainer lines are rated to 200 pounds and made from pre-stretched Spectra to the standard trainer line length of 20 meters. Blue line color makes these lines highly visible. Stitched loops on both ends ensure easy larkshead connection to any trainer kite out there including HQ, Slingshot, Sensei, Ozone, Liquid Force, Best, Cabrinha, North, Airush, Naish, etc. Trainer kites are typically from 1m to 4m (as in square meters) in size.

20 meters is the standard length for trainer and small-foil lines, however we can offer custom lengths for an additional cost. Longer lines will generate slightly more power.

## Specifications:

- 200 lbs. test strength
- Standard 20m length,
- Custom Length Available
- Pre-stretched Spectra
- Sleeved and sewn loops on both ends in color-coded sleeves
- Available in sets of 2 or 3 lines

# Bridle, Leader, and Chicken Loop Line

Click here to Shop This Category at  
[www.pksgiving.com](http://www.pksgiving.com)

# Spectra Leader Line

Leader Line for repairing water, land, and snow kites and bars. The line can be ordered in bulk by the foot for do it yourself repairs, or in custom lengths with or without sewn in loops to replace specific lines. One great idea is to order a couple of lines with loops on one end so you can simply cut the bridle down to the length you need and make a knotted loop for a quick repair in case one breaks.

## Specifications:

The Leader Line is 7/64th" Diameter Spectra and rated to 1200 lbs.

Available in any length from 1 foot too 100 Feet with or without loops  
Sewn on the ends.

## Colors:

Red  
Yellow  
Blue  
Grey

[Back to Index/Shortcuts](#)

# Standard Size Valves

Most Valves will come standard with a 3 Inch Tear Aid Self Stick Patch. This is generally more than adequate to ensure good adhesion and coverage when replacing a valve that has delaminated or peeled off of a bladder. A 4 Inch Mega Option is always available for valves that have a standard 3 inch patch.

Some Valves, like the Cabrinha Sprint Valve and the Switch One Pump valve will come standard with a 4 Inch patch due to the larger valve base. There is no "Mega" option for these valves due to the increased standard size.

All FixMyKite Valves are manufactured using Type "A" tear aid for the most secure adhesion to the bladder.

[Back to Index/Shortcuts](#)

# Mega Patch Valves

The Mega Patch option allows you to select the MegaTear-Aid patch on the base of the valve. Standard valves have a 3-inch diameter base and the Mega patches have a 4-inch diameter base. This extra inch diameter on the Mega valve means 77% more adhesive and surface area compared to the standard valve patch size. The additional surface area provided by the Mega valve patch is necessary when the old valve is cut from the bladder or the bladder is torn or warped when the old valve is removed.

4 Inch Diameter Patch

[Back to Index/Shortcuts](#)

# Velcro Option

The "Add Velcro" option provides you with velcro attached at the base of the valve as you would see on an original factory bladder. The velcro on the valve adheres to the velcro on the inside of the leading edge casing, stopping the bladder from twisting when tightening or loosening the screw cap which prevents a blow-out from a twisted bladder.

[Back to Index/Shortcuts](#)

# Bladder Patch Install Kit

The "Bladder Patch Install Kit" option is for when your old screw valve has to be cut out of the bladder leaving a hole in the bladder larger than the patch size of the screw valve. The Bladder Patch Install Kit includes a 6x6-inch (15.24 x 15.24cm) adhesive patch and 5x6-inch bladder protection sheet. Use the bladder protection sheet and large patch to patch the large hole cut in the bladder, and then install the screw valve on top of the patch. If your old valve peels off of the bladder easily, you do NOT need the bladder patch install kit.

# One Pump Hose And Hose Kits

OEM Silicone One-Pump Hose is a heavy-duty flexible hose with a 1/4" inner diameter, standard factory one-pump hose. This means it will not just be the only replacement hose you will ever want to use, it will last! Hose is sold by the foot so you can cut it to your specific needs. For more than one foot, just up the quantity when ordering. hose will be sent in 1 continuous length of hose.

**By The Foot**

PKS One-Pump Hose is a heavy-duty flexible hose with higher density than standard factory one-pump hose. This means it will not just be the only replacement hose you will ever want to use, it will also last years and years and is UV-retardant

**PKS One Pump Hose**

[Back to Index/Shortcuts](#)

# PKS High Flow One Pump Hose 3/8" (10mm) Inner Diameter

The PKS Kiteboarding High Flow One Pump Hose. Works on kites with the larger high flow one pump system. Easy to use and installs fast. Sold by the foot so you can measure and cut to the exact length you need.

**3/8" ID High Flow Hose**

# Standard 1/4" ID One Pump Hose Kits

The PKS One Pump Hose Kit has all you need to replace the hoses and clips on your kite with an external one pump system. This kit works on most kites (except Airush, Blade, Epic, Gaastra which need larger diameter hose); only Naish kites with the internal Octopus valves and older kites where you pump each strut separately don't need hoses at all. Easy to use and fits like the original factory set. Choice of 3 or 5-strut kits.

3 Strut Kit

5 Strut Kit

# PKS High Flow One Pump Hose Kit

## 3/8"(10mm) Inner Diameter

The PKS Kiteboarding High Flow One Pump Hose Kit has all you need to replace the hoses and clips for an external one pump system. Works on kites with the larger high flow one pump system. Easy to use and installs fast. Choice of 3 or 5-strut kit. Tubing is 3/8"(10mm) inner Diameter

### 3 Strut Kit Includes:

- 3 one pump hoses
- 3 one pump clips
- 6 zip ties

### 5 Strut Kit Includes:

- 5 one pump hoses
- 5 one pump clips
- 10 zip ties

# Tuff Bladders Kite Leading Edge Blank

Fix My Kite Tuff Bladders are different from any other bladder on the market. Over 2x as durable, these bladders have been specifically developed to withstand the abuse of kiteboarding. The big secret to our bladders is stretch. While other bladders are stiff and pop easily, the polyurethane Tuff bladders stretch when put under pressure and then quickly go back to their original shape. Use Tuff bladders in any kite when you want the toughest, most durable bladder available.

The Fix My Kite Tuff Bladders are bladder blanks, meaning they are just the bladders with no valves. In order to use these in a kite you will need to purchase the self-stick valves for your kite in addition to this bladder.

Need a Custom size, we can do that too.

## Sizes:

21 feet = 6.40 meters

25 feet = 7.62 meters

28 feet = 8.53 meters

32 feet = 9.75 meters

# Seam Tape - 1/4" Double Sided

Double-sided Seam Tape is ideal for kite repairs along edges that have to be closed: leading edges, trailing edges, strut, etc as well as foil kites. This high-quality double-sided tape is great for general sail seaming. Great adhesive and initial tack means you're not fumbling material and constantly resticking, and it will stay in place down a long length as you run it through the sewing machine. It has very high long-term adhesion and is a non-yellowing material on a low-stretch carrier. In other words, the perfect double-sided seaming tape.

## **Specifications:**

The Seam tape is .25 inches (6.35mm) wide and 216 feet (72 yards or 65.83 meters)

# Tear Aid - By the Foot or Roll

# Aquaseal

Aquaseal is a highly flexible, elastic urethane repair adhesive that bonds to neoprene, nylon, Gore-Tex, Hypalon, urethane, rubber, latex, vinyl (PVC), and other trilaminates, many fabrics, foams, composites, many plastics & more.

Aquaseal is the industry standard for maximum strength repairs to tears and rips in your wet suits, dry suits, waders, dry bags, latex gaskets, and other outdoor gear. Flexible urethane formula waterproofs, seals, and protects against abrasion. Hundreds of watersports and household uses. Aquaseal is a clear, waterproof adhesive and sealant, specially formulated for the flexibility, adhesion and abrasion protection you need to keep you going.

[Back to Index/Shortcuts](#)

# Seam Grip

Seam Grip goes beyond seam sealing and patching holes. It waterproofs tents, improves traction, and offers abrasion resistance, too. It works on all types of fabrics, including nylon, vinyl, neoprene, PVC, rubber, and leather.

So take a tube of Seam Grip wherever you go, because you never know when gear will rip, leak or fall apart. Save your gear and your adventure? with the award-winning Seam Grip waterproof seam sealer.

Urethane based seam sealer and repair adhesive

Permanently seals seams and repairs rips, tears and holes in outdoor gear

Flexible, waterproof formula is washable and unaffected by extreme cold or heat

1 oz. tube seals seams about 144" (1/4" wide bead) - on average this is the critical seams of a 2-person backpacking tent

With Cotel-240 Cure Accelerator added, 1 oz tube seal seams about 288"

8-12 hour cure time - only 2 hours when used with Cotel-240

When applied, Seam Grip cures by reacting with the humidity in the air. It doesn't 'dry' the way other glues do

Safe for use on natural and synthetic fabrics

Excellent adhesion and abrasion resistance

Editors' Choice Gold Award from Backpacker Magazine

Made in USA

[Back to Index/Shortcuts](#)

# GluFix

GluFix is the only adhesive specially formulated for kitesurfing equipment. Fast drying, ultra-resistant and flexible, GluFix will allow you to make permanent and durable repairs on your kitesurf equipment. Used with FiberFix, one GluFix tube allows you to repair a tear up to 48" long!

# Pumps - Hand and Electric

[Click here to Shop This Category at  
www.pksdistribution.com](http://www.pksdistribution.com)

# PKS Pro Flow V3

The PKS Pro Flow V3 kite pump is the next ingredient for your successful kite session. Our tweaked version of the newest and best pump on the market is constructed with high quality components and measures 20" from top to bottom, taller than the older 15" and 18" pumps, for up to 2.3 liters of air per pump.

Internal friction has been virtually eliminated so this pump ensures effortless inflation time after time. With high grade shaft and piston seals, the v3 PKS Pro Flow Pump will outlast any other pump on the market.

[Back to Index/Shortcuts](#)

# PKS Pro Flow V3

The pro Flow v3 features a PSI gauge integrated into the handle, foam air filter to catch sand, new premium extra-durable and flexible hose, pump adapters for standard 9mm inflate as well as larger boston screw valves, ergonomic handles and foot base, and kite tether.

The pump can be changed from double to single action inflation using the easy-twist selector switch on the back of the pump. The single stroke feature is great to top off your kite or to avoid back strain on the upstroke.

## Available Sizes:

20" (Orange)

24" Mega (Blue)

# Bravo/Scoprega Electric Pumps

[Back to Index/Shortcuts](#)

# Bravo 20-2

The Bravo 20 Electric Pump has everything you need to pump your kiteboarding kite, stand up paddle board (SUP), raft, boat, dinghy, kayak, mattress, pool toy, or other inflatable items all in one convenient package. Twin-cylinder, single-stage pump fills quickly and to higher pressure than most electric pumps on the market. An easily-selectable pressure dial indicator lets you choose the PSI and automatically shuts-off when the desired pressure is reached. The pump houses an internal, rechargeable battery that can be easily trickle-charged using the included wall charger. If the battery is drained but you still want to pump something, the pump can be run from other 12V power sources such as a car battery using the included power cable.

# Bravo GE-25 SL

The Ultimate Shop / School / Dock / Demo Day pump. Pumps a kite 30% faster than the Bravo 20. We pumped over 40 Kites in our repair shop on a single charge.

## Key features:

- Double Stage electric inflator for high pressure applications, HVHP
- Automatic switch from turbine to double compressor stage
- Easy setting of the desired pressure and pressure control through manometer, automatic stop
- LED indicators for pump status
- Inflation fittings available for the most common valves
- Carry bag included

# Replacement Pump Hose

New LDPE Material with increased number of hose corrugations per inch for increased flexibility and a longer life.

The PKS HD Premium Pump Hose will fit most any Kite/SUP pump out there (new and old) and is heavy duty, flexible, and kink-resistant. The MALE end of the hose attaches to the pump while the FEMALE end attaches to pump adapters/nozzles.

Before now, hoses have not been sold separately. Manufacturers would rather sell complete new pumps rather than a replacement hose. Most kite pump hoses are not super-duty and crimp, kink, or crack over time, but now you can replace them easily and at a fantastic price. This is the same hose on the PKS Pro Flow V2 Kite Pump.

[Back to Index/Shortcuts](#)

# Replacement Bravo Electric Pump Hose

OEM Replacement Hose for Bravo 20 and Bravo 25 Electric pumps. Now with a double "O" Ring for a more air tight and higher pressure coupling to the pump.

# Bravo 20-2 Main and Control PCB

This is a replacement Main and Control PCB, with cables. part SP Z052 for the Scoprega GE20-2 / Bravo 20-2 Electric Inflator Pump.

## Features:

- Both Main and Control PCB set
- New connector cables

# Bravo 20-2 Piston Group

This is a replacement Piston Group / Compressor Unit part SP Z146 for the Scoprega GE20-2 / Bravo 20-2 Electric Inflator Pump.

Features:

- Dual Piston Single TSage Compressor/Piston Group
- Integrated High Torque 12v Electric Motor

# Bravo 20-2 Top Case

This is a replacement Top Case / Cover with Gauge and Control PCB installed. part SP Z144 for the Scoprega GE20-2 / Bravo 20-2 Electric Inflator Pump.

## Features:

- Installed Pressure gauge and pressing setting dial
- Pre Installed Control PCB and On /Off Switches

# Replacement Bayonet Hose Fitting

## Bayonet Hose Fitting

This is replacement Bayonet fitting that is on the outlet side of the Hose where you connect an adapter or directly to kites. The fitting is a compression fitting that needs to be glued in place with something like Aquaseal or Seam grip to ensure it stays in place and maintains an air tight connection.

**Works on both Standard Kite Pump hoses as well as Bravo Electric Pump Hoses.**

# PKS Pro Flow and H1 / H3 Pump Replacement Seal Kit

Replacement Shaft and Piston seals for PKS Pro Flow pumps or any HP1 / HP3 pump.

Use these replacement seals to make your pump act like it is brand new again.

Works on all H1 and H3 hand Pumps.

Includes both the Piston Seal and the Shaft Seal

# Bags - Travel / Storage / Protection

Click here to Shop This Category at  
[www.pksdistribution.com](http://www.pksdistribution.com)

# Ozone Travel Board Bag

This high quality durable bag will hold 2 boards and 2-3 kites with plenty of space for your bars and lines, harness, pump, wetsuit and travel clothes. There is a separate double-padded section which will keep your board locked in place with straps to avoid movement and damage during travel. The massive kite and clothing section has three compression straps outside to keep the bag cinched to a minimum size. The zip pocket inside the top compartment keeps your fins and screws safe if you decide to remove them on long hauls. A large zip pocket on top of the bag makes it easy to access travel documents, maps or your wind-meter without having to open the main bag. All the buckles and straps can be tucked away when they are not in use to avoid any damage to them if they get caught during unwieldy airport baggage handling. Both tips are protected by the addition of extra scuff resistant material. Back pack straps make this the all around kiteboard bag of choice!

## Features:

- Super tough, tear resistant material
- Length: 145cm
- 2 tough grab handles
- Removable rucksack style carry straps
- 2 zip pockets
- Back pack straps
- Address label window
- Extra Reinforced ends
- EVA foam padding for ultimate board protection
- A lightweight 2.5 kgs

# Board Retrieval

[Click here to Shop This Catagory at  
www.pksdistribution.com](http://www.pksdistribution.com)

# Ocean Rodeo Go Joe

The Ocean Rodeo Go-Joe is everything you need for leashless board retrieval assistance: stronger, better, lighter, and easier to use than before. A great idea and an innovative product that is moving from beginners to wave riders and mainstream users. If you don't have one it is worth to check it out.

Traditional surfboard-style leashes used to connect kites with their boards have proven to be dangerous in both the water and on land. The GO-Joe is a new leash-free tool to assist in the retrieval of your kiteboard without fear of being impacted or impeded by a leashed board. The GO-Joe is perfect for beginners and intermediates learning board recovery techniques. Advanced riders will appreciate the faster board recovery in extreme conditions or while learning new tricks.

# Trainer Kites

[Click here to Shop This Catagory at  
www.pksdistribution.com](http://www.pksdistribution.com)

# Ozone Uno V2

The Uno V2 is a simple, affordable and robust inflatable de-power trainer kite. It's an ideal Kitesurf trainer for schools, and perfect to have as a fun addition in the quiver to get family and friends into kiting! Being a lightweight package it is easy to travel with and keep in the car.

Responsive, fun, smooth and stable define the Uno V2. It comes in three sizes - 2.5m, 4m and 6m all with enough power to ensure beginners can easily progress to the next level.

The Uno V2 flies with our standard Kitesurf control system, this enables the student to progress easily to larger kites and to remain familiar with the control system set up. We recommend using line lengths of 15-25m.

**Requires Standard 4 Line Control Bar (not included)**

**Sizes:**

2.5m, 4.0m, 6.0m

[Back to Index/Shortcuts](#)

# Ozone Ignition v3

Designed to bring out the kiter within everyone, the Ignition 3-line trainer kite is smooth and stable with steady response and power to ensure easy progression into all kite sports.

The Ignition V3 features our market leading Internal Landing and Re-Launch System - this unique system combined with the Wrist Leash gives you the ability to safely land the kite by yourself and guarantees easy re-launch. If you feel too much power or are ever unsure all you have to do is let go of the bar, the kite will land automatically with minimal power until you are ready to re-launch.

## Features:

- Simple to set up and fly, with lines pre-attached
- 3-Line Internal Landing and Re-launch System
- Performs in a wide range of wind conditions
- No previous kite experience required
- Light weight and compact for easy travel

## Sizes:

1.5m, 2.0m, 2.5m, 3.0m

# Rush Pro School 300 R2F(ready to fly)

You want to be well-prepared for kitesurfing, snowkiting as well as landboarding? Are looking for a trainer kite, but would also like the challenging characteristics of a real depower kite? With the Rush Pro School 300 we have developed the perfect partner for you - robust, safe and with very easy handling. The Rush Pro School 300 flies just like a big kite, without asking too much of you. Depending on the wind conditions, your kite sessions can be anything between very comfortable and challenging. The depower of the Rush Pro School 300 allows you to shift up a gear whenever you feel like it. Power and speed to the max, but always with full control - flying the Rush Pro School 300 is just simply fun. And it helps you to make fast progress.

## **Features:**

- Complete with depower controlbar and chickenloop
- Ready-to-fly set
- Simple handling - uncomplicated flight characteristics
- Large wind range
- Multiple adjustment options
- Intended to be used with a waist or seat harness

**Includes Depower controlbar with chickenloop**

# Weatherflow Weather Meter

The WeatherFlow WEATHER Meter is the first WIRELESS Bluetooth® Smart portable and mountable weather station under \$100 that syncs up to Smart phones and devices so you can record, share, and save all the weather data you could need. Works with iPhone, iPad, iPod, and all major Android devices.

The WeatherFlow WEATHER Meter is the first of its kind by a US-based manufacturer, having been engineered here then calibrated at the University of Florida's Aerospace Engineering Department as an amazingly-priced followup to their very popular WIND meter for phones and other smart devices. You know WeatherFlow from their Wind Meters already, but also iKitesurf.com, iWindsurf.com, Wind Alert, SailFlow, FishWeather. Needless to say, they've been around, they know windmeters, and this revolutionary product with Bluetooth® Smart technology is no exception to their goal to view and share live-action weather around the world with a great product at an affordable price.)

[Back to Index/Shortcuts](#)

# WeatherFlow Wireless Bluetooth WIND Meter

WeatherFlow WINDmeters are pocket-sized anemometers that capture highly accurate wind measurements. You can record data in a variety of compatible apps including the free Wind & Weather Meter app and share reports instantly via email, SMS, Twitter, Instagram, and more.

WINDmeter connects wirelessly to your smartphone up to 100 feet away. From sailors to farmers, now anyone can capture and share accurate wind data with the WINDmeter.

## Features:

- Wind speed (avg, gust, apparent, true)
- Wind direction (magnetic, true)
- Crosswind, headwind, tailwind
- Wireless connection up to 100 ft away
- Wind Range 2-125mph

# Skywatch Wind - Wind And Temperature Meter

A pioneer in the field of hand-held anemometers, JDC Electronic has been focusing its know-how on the development of quality anemometers since 1984 with its Skywatch brand, bringing together two watchwords: simplicity & efficiency.

The Skywatch Wind measures wind speed, air temperature and wind-chill rapidly and accurately. Small enough to bring anywhere, insensitive to dust and shock with a user-replaceable propeller, the newest member of the JDC family is designed and manufactured in Switzerland.

## Features:

- Wind speed
- Maximum wind speed
- Lifetime maximum wind speed
- Air temperature
- Wind chill (perceived temperature)

Limited Edition

# Skywatch BL300

Skywatch BL300 is a complete weather station connected to your smartphone via Bluetooth wireless technology. It accurately measures wind speed, temperature, humidity, and measured data can be stored and shared on Facebook, Twitter, Instagram or [bl.skywatch.ch](http://bl.skywatch.ch). The Skywatch BL300 is especially dedicated to all outdoor activities like sailing, kite surfing, paragliding, hiking as well as professional use such for agriculture, construction, and more.

## Measurements:

Windspeed    Wind Direction  
Temperature    Wind Chill  
Heat Index    Humidity Dew  
Point

## Features:

Omnidirectional propeller  
Retractable sensor protects the sensor during storage and travel  
Low inertia sensor measures accurately at low wind speeds  
Bluetooth connection and battery level status indicators  
Powered by rechargeable battery via micro USB, with charging indicator  
Dimensions: Ø26 x 116 mm (closed, without clip)  
Weight: 66g (without clip)  
Made from anodized aluminum  
Protection class IP67  
Swiss official calibration

**Back  
in  
Stock!**

# Self Launch Sand Anchor

This Self-Launch Beach Anchor can be used to self-launch your kite with nothing around but sand or rocks. This is truly the best Sand Anchor you'll find, because you don't have to drill as with a stake and it folds up into nearly the size of your hand. Also, you can store it with your kite because there are not sharp points or edges to cut your gear unlike a dog stake! Don't puncture your very expensive and important gear with harder-to-use and more expensive equipment.

## Features:

- Holds Up to 40 Pounds of Sand
- High Strength Materials
- Leaves the Sand at the Beach
- Compatible with Self Launch Tool
- Fold up small for easy storage

# EZ Leash Connect

PKS EZ Leash Connect is a simple way to add a connection point to any harness for kitesurfing or windsurfing. Made of very strong but lightweight webbing and a thick, high-load stainless steel marine-grade ring, it can easily larkshead around your spreader bar, tensioner (adjustment) straps, tow handle, or other secure parts of your harness.

Just larkshead the webbing onto a strong convenient place, and you've got the perfect place to clip your safety leash. Check out the video below to see how simple and effective is the PKS EZ Leash Connect.

[Back to Index/Shortcuts](#)

# PKS Changing Towel

The PKS Changing Towel lets you quickly change clothes for your next kiteboarding session without wasting time or getting arrested for indecent exposure. The simple design is hand-crafted in the U.S. and reinforced in all the right areas to make sure it lasts. The Changing Towel also makes a great gift for any water sports enthusiast.

Colors will vary, but you can request custom colors and we will do our best to accommodate.

# Hitch Safe

Here is the solution for any surfers or kiteboarders looking for a secure, fast, easy way to store their keys while out on the water. The HitchSafe slides into your current standard 2" Hitch Receiver on your Truck, SUV or Van and is secured inside the Receiver Hitch via two bolt retaining bars inside the HitchSafe. The Hitch Receiver itself is a solid steel vault that combined with the HitchSafe provides the most secure location on your vehicle to store spare keys, credit cards, cash and driver's license!!

To access your keys you simply release the Rubber dust cover (made to look like any normal Hitch Cover), enter in your personal 4 number dial combination, which then releases the drawer and allows access to your keys, cards or more...

The HitchSafe easily installs/uninstalls in seconds with no tools required!

[Back to Index/Shortcuts](#)

# Sand Weight

The PKS Kite Sand Weight Bag is an essential item for kiteboarders. You can use the sand weight bag to stop your kite from blowing away on a windy day, reduce wear on your kite sail by stopping fluttering when the kite is parked, and it can also be used for self launching. It also works great to self-launch a foil kite if you have a grassy launch spot.

Just fill the sand weight bag 3/4's of the way full with sand and close with the velcro. The sand weight bag's double-fold velcro closure system prevents sand from coming out when you don't want it to. The four separate compartments for sand allow the bag to be laid over the leading edge of the kite and not have all the sand rush to the tips of the bag. Tough and durable material will take a beating and heavy-duty webbing will take the load of the sand and then some. Every kiter could use one or two of these.

[Back to Index/Shortcuts](#)

# Wet Bag / Changing Mat

The Ozone Wet Bag doubles as a changing mat and is perfect for changing on the go. Changing on the mat helps keep sand off your wetsuit and also keeps your car dry and less sandy from all the wet gear. Circular design has no seams to leak and heavy duty pull cord cinches the edge of the mat to enclose your wet gear.

When flat the wet bag is 3ft across.

Features:

- Easy pull drawstring

- Made from heavy duty polyurethane laminate

[Back to Index/Shortcuts](#)

# Wetsuit Ankle Cuff Straps

The PKS Wetsuit Ankle Cuff Straps prevent water shooting up your wetsuit and filling up the legs with water.

No one likes to ride with water-balloon cankles from excessive up-spray, but many suits don't come with ankle cuffs because the suits are not made specifically for kiteboarding or quality ankle cuffs are not easy to find for sale. PKS solves both of these problems by making ankle cuffs easy to find, affordable to buy, and universal in application with any wetsuit.

# Why Wind Carver?

The Wind Carver is the ideal longboard skateboard for cruising, carving, land paddling, and Wingboarding or Kiteboarding on Land. It's an exhilarating longboard to ride that "feels" like riding waves on asphalt and is easy and fun to ride even if you've never been on a skateboard before.

The Wind Carver's unique 7" diameter wheels float over cracks and small rocks that would stop smaller wheels while the flat profile and sharp edge tires provide excellent grip to the ground. The larger and dropped deck gives riders a wider and more stable stance. The deck is made of bamboo outside and Canadian maple inside with a layer of fiberglass for added stiffness for the perfect balance of flex, durability, and stiffness and and clear sand finished grip on top.

[Back to Index/Shortcuts](#)

# Wind Carver Features

Large 7" diameter polyurethane wheels

Dropped deck, Low to ground for maximum carve

Reverse kingpin high strength trucks.

# PKS Elite Universal Wing Leash Line

The PKS Wing Leash is made using heavy duty 3/16" Spectra hollow core line with high elasticity bungee line inside. The ends have 7/64th spectra line that has been wrapped and sewn in place creating a locking larks head for the ultimate strength, security, and versatility. By using the 7/64" spectra line for the loops, you are able to easily connect to multiple wing or harness connection types such as hand shake, larks head, or ring connections. This combination gives you strength, versatility and ease of use.

## Features:

- Pull Tabs on Leash Ends
- High Strength Spectra Line
- Locking Larks Head Loops
- Comes with Quick Connect Pigtail

## Sizes:

Small - 52"(relaxed) - 72"Stretched (2-4m Wing)

Large - 60"(relaxed) - 88"Stretched (5-7m Wing)

# PKS Wing Leash Swivel

The PKS Wing Leash Swivel is perfect for wrist or waist leashes. A high strength heavy duty Wing Leash swivel. It is an anti coiling mechanism that helps to prevent twists and tangles in your leash line caused by constant wing positioning and maneuvering.

Features:

- Stainless Steel Ball Bearings
- Can Work on any Wing or leash
- Excellent corrosion resistance

# PKS Quick Connect Pigtail With Stopper Ball

New From PKS - Quick Connect Pigtail Set w/Stopper  
**\*Sold Individually**

Designed to be used with Wing leashes for a quick connect and removal from one wing to another. No need to have a leash for every wing, just easily move your leash from wing to wing using the Quick Connect pigtail with stopper ball.

## Features:

- 4 Inches Loop-Stopper Ball Length
- 16mm Ronstan Stopper Ball
- Full Length splice secured with precision micro stitching
- 100% High Strength Low Wear Spectra Line
- Sold Individually

# PKS Wingboarding Webbing Loop Adapter

PKS Wingboarding Harness Line  
Webbing Loop Adapter

The PKS Wingboarding Harness  
Line Webbing Loop Adapter is an  
adapter for attaching the  
Wingboard Harness Line to the  
boom on your wing.

A Universal fit, you can use these to  
attach to any Boom or hard handle  
wing like the Unit, or Cyclone.

Includes 1 Webbing Loop Boom  
Connector.

# Ozone Connect Wing Harness

The Connect Wing harness The Connect Wing Harness V1 makes riding longer distances a real pleasure, giving you time to relax your arms and maximise your session. The slim-line lightweight design offers ultimate freedom of movement when unhooked with support to hook in, lean back and cruise when you want.

The Connect Wing harness has been designed to comfortably slide on skin and neoprene. It can easily be rotated around your waist when lying on a board to paddle, keeping the hook away from the board and avoiding damage. An open angle Spreader Bar hook allows easy hooking in and out.

## Sizes:
